Bremerton, WA 98310

Dear Engineering Division:

As part of the EPA-Targeted Brownfields Assessment (TBA) project, the EPA has contracted Ecology & Environment, Inc. and White Shield, to install two (2) soil borings in the right of way of Thompson Ave. The soil borings are located on asphalt. The asphalt shall be removed prior to drilling. The driller will accomplish this by a neat square cut with a demolition saw. The cut hole must be large enough to accommodate the hollow-stem auger drilling and soil and groundwater sampling completion. Once soil and groundwater sampling has been completed, both boring holes will be filled with a bentonite slurry and capped with asphalt patch in accordance with the Washington Department of Transportation requirements.

The EPA will ensure that the Contractor's workmanship complies with the requirements of the City's right-of-way permit and inspection.

This work will be conducted under the START contract EP-S7-06-02 Technical Direction Document #07-01-0008.

I may be reached at 206-553-2594 with any questions.

Sincerely,

Joanne LaBaw  
TBA Coordinator

cc: Dan Miller, City of Bremerton  
Bryce Robbert, White Shield/Ecology & Environment, Inc.
